

# LOGIC PUZZLE

Five children stopped at a garage sale one Saturday morning. Each child bought one item. From the clues provided can you determine what each child bought and how much each spent for their purchase?

1. Eric spent the most money, and Amy spent more than Kirsty who didn't spend the least.
2. Emma and Eric both bought toys that could be assembled. Kirsty didn't buy the Barbie.
3. Rebecca loves dolls and was very happy with her purchase, Amy bought the outside toy.
4. The puzzle was the least expensive purchase and Rebecca spent an even amount of money and Kirsty spent exactly half as much.
