

# Squigly's Easter Logic Puzzle

Mrs. Brown helped her four children to colour eggs for Easter. The two boys and two girls are 2, 4, 7 and 9 years old. Their names are Sarah, Amanda, Joey and Tommy. They coloured two eggs each, one a solid colour and one was the same colour with a white stripe.

Clues:

- Mrs Brown had to help the youngest boy and girl. The oldest child liked a colour that starts with the letter B.
- Tommy is 7 years old and his brother's favourite colour is red.
- Amanda and Sarah are very happy to be sisters and they both liked the same colour. When they finished they are going to switch their striped eggs, then they will each have a blue and a purple egg.
- Joey is not the youngest child.
- The child with the blue striped egg helped the child with the purple striped egg when Mrs. Brown was helping Joey.
- Sarah kind of likes purple too.

	Egg Colours				Ages			
	Red	Blue	Green	Purple	2	4	7	9
Sarah								
Amanda								
Joey								
Tommy								
2								
4
